ssims@water.ca.gov

Hi Sue - See attached redline with my edits - nothing major. Subject to anything Tom may add, I am fine with the document going out Monday. It is more than enough to get us into the process. I will be on the road until mid-afternoon Monday. Feel free to call or email after that.

Below is a teplate we on the federal side have developed - it's tentaive only and subect to review and revision - for the items in the federal work plan. I forwarded the template to Lester late Friday.

Template: Identification of Action
            Participating Agencies
            Purpose and Expected Outcomes
            Timing of Steps Toward Completion and Expected Completion Date
            Status
            Background.

David and Tom – Attached is a revised version of the workplan. I should have put it in track changes – but I took your edits, and Lester/Jerry had just a few others: Delete 2D regarding WQMAP, add under 4A "exercise flexibility and discretion of smelt and salmon biological opinions," and under Flood Risk (5B) add the issue of the Corps' Levee Vegetation policy.

Unless you have additional edits or concerns, I'd like to get this distributed by mid-day on Monday.   Let me know. Thanks.

Sue
